

We don't build robots. We make them **actually run** on site.

KOTI is the robotics brand of Guangdong KOTI Intelligent Engineering Co., Ltd. We are a multi-brand robot integrator for firefighting, industrial mobile (AGV/AMR), embodied-AI and K-12 educational robots — handling selection, integration, commissioning, acceptance and local maintenance.

— What we do

- **Scenario assessment** — site visit, measured floor conditions, written scope
- **Model selection** — two or three options with trade-offs, not a catalogue dump
- **Integration** — power, network, safety fencing, docking with existing systems
- **Acceptance** — criteria agreed before the PO, signed by us
- **Local service** — response times written into the contract

— Why buyers work with us

- **One accountable party.** Selection, import, installation and after-sales sit with one team.
- **We do the weak-current work ourselves.** A decade of building wiring, access control and security integration — not subcontracted to trades that have never seen a robot.
- **Local density.** Headquartered in Dongguan, covering the Pearl River Delta and wider Guangdong.

— Four lines, one point of contact

Firefighting robots

Fire / emergency rescue

Industrial mobile robots

Factory / warehouse / logistics

Embodied-AI platforms

University / research institute

Education humanoid robots

K-12 / coding / AI classroom

All products belong to their original manufacturers; specifications, models and pricing follow each maker's latest official materials and authorization letters. KOTI is responsible for selection, procurement, integration, deployment and maintenance.

Backed by a real factory, not a trading desk

The facility and certificates below belong to our equipment manufacturer (the equipment manufacturers we work with). We do not present them as our own — we connect their capacity, testing and certifications to your project.

Final assembly · burn-in testing · commissioning cell

— Certifications held by the equipment manufacturer

CR · CE · Functional safety · ISO 9001 · Cleanroom grade — scanned copies available for verification on request.

— Company facts

Legal entity
Guangdong KOTI Intelligent Engineering Co., Ltd.

Established
2014

Paid-in capital
RMB 10 million

Coverage
Humanoid · Commercial · Industrial · Firefighting · Education

Also known as
KOTI Robotics (柯帝机器人)

Headquarters
Songshan Lake, Dongguan, Guangdong, China

Business focus
Robot export and on-site application deployment
